

Do you find a sustainable world important, and do you have finance skills? This is your chance to use those skills to make a real contribution towards a better world!

Sail for the Future consists of a group of students and young professionals, associated with different universities (Delft, Utrecht, Leiden, Rotterdam), who believe that a fast transition towards a sustainable economy is possible for a better and brighter future. This group of young people does not want to protest, instead they want to contribute constructively by enabling true change. For this reason, we will sail together with established Dutch companies to the climate summit (COP26) in Scotland and kickstart the transition during our 5-day innovation program. Here, participants from companies will gain new experiences and inspiration which they will be taking back to the workplace, where they become ambassadors of change.

We are looking for someone who wants to organize this together with us by fulfilling the function of treasurer. The organization is growing rapidly and we are looking for someone to delve in and take the lead in the finance department. Experience with finance is preferred, and extensive financial knowledge is a plus, but any affinity with number is welcome.

Profile treasurer:

- Experience with financial administration (e.g. in student associations)
- Able to keep a good overview
- Experience with Excel

The treasurer will have the following tasks:

- Set up the budget
- Identify possible cost items
- Select cost items, or manage others therein
- Financial administration
- Set up sponsor packages
- Keep a financial overview – income and expenditure
- Invoicing
